

ADERIVA Cabinet  
Product Sheet

RS

YEAR  
2026

PRODUCTION  
Handmade in Portugal  
Made to order

MATERIALS  
Moleanos Limestone (extracted in Portugal)  
Stainless Steel

DIMENSIONS  
W120 × D38 × H160cm  
W 47.2" × D15" × H63"

WEIGHT  
200kg  
440lb

PREASSEMBLED  
No

CRAFTS

As a product shaped from moleanos limestone and stainless steel, each piece is unique. Natural characteristics of the stone, including tonal variations, pores, and surface irregularities, are inherent to material. Stainless steel components may also present subtle variations in finish resulting from fabrication processes. The design preserves these qualities rather than concealing them. Variations between pieces or orders do not constitute grounds for cancellation or return.

CLEAN & CARE

Moleanos limestone is a natural stone and may present surface variation and open pores. Stainless steel surfaces may show fingerprints and should be cleaned regularly. Use a soft, dry or slightly damp cloth. Do not use household cleaners containing chemicals, acids, bleach, or abrasive agents, as these may damage the surfaces. Avoid excessive moisture, staining substances, or extreme temperature changes, and promptly remove spills to preserve the materials' appearance.

PACKAGING

Free plastic packaging  
Weight  
40kg  
88lb
